ENGINEERING & TECHNICAL

WE PROVIDE TECHNICAL STAFF WITH THE BEST QUALIFICATIONS & PRACTICAL EXPERIENCE

We recruit and provide the best skilled workers currently available in the marketplace, but are very aware that there is an increasingly ageing workforce across some trades, and a skills shortage in some sectors.

TEMP-TEAM has forged strong relationships with local training providers to enable us to source graduates, as well as attract candidates completing apprenticeships.

We supply permanent and temporary staff to companies in the mechanical,

metalwork, structural, petrochemical, pharmaceutical, electrical and electronics sectors.

Our Technical division covers a range of disciplines, from draughting and design to fitting and maintenance.

TEMP-TEAM understand the time restraints that your managers work within, and with this in mind we aim to bridge the gap by providing permanent, temporary and contract recruitment solutions.

KEY ASPECTS OF OUR SERVICE ARE

- In-depth face-to-face interviews
- Thorough reference checks
- 24-hour, 7-day response
- Inspection of certificates & relevant accreditations
- TEMP-TEAM branch network
- Close personal contact
- Close follow-up
